Location

17 Troy Street
Emu Plains

Sector

Education

Client

OLOW Catholic Primary School

Project Manager

Wayne Stepherson

Supervisor

Glenn Amies

Classroom refurbishment including new carpets throughout, joinery, furniture, doors, windows and design and installation of a curved glass breakout room.

We use the following text as a placeholder during the design phase as it allows our clients time to gather all of their content ready for the final review. This is an industry standard.

If you have any content, this includes images and text, please email us so we can incorporate it in to your design. Images used throughout this design are also used placeholders so we can continue on your design until you provide us with photos.

THE RESULTS

Client brief ie. What did they want to achieve?

Refurbishment of learning spaces to create and open plan learning space with new disabled toilets for learnings spaces for students and students with special needs.

Were there any challenges or any 'fun and exciting' parts of this job?

Challenges being the timeframes to complete the works and the excitement of the delivery of the new fun furniture.

How did the curved glass breakout room evolve or how was the concept developed ?

Initially a rough sketch from the architect and then a discussion and ideas from C2G Commercial who designed shop drawings and manufactured the space.

How was colour scheme decided upon?

Colour scheme was a continuation of the existing to adapt to the new spaces and the furniture selection was by the school.
